

Model I-36

Mancooler Fan

heat wagon

- Industrial strength construction for severe factory environments
- Powder coated heavy gauge, all-welded steel fabrication for high impact resistance and minimum maintenance
- Lifting hook for easy relocation
- Heavy-duty steel casters (2 locking) provide mobility
- Overload protection
- Motor starter shielded from incidental damage
- Air delivery can be adjusted through 5-pin lock positions
- Reliable ABB(Baldor) 5HP motor with heavy-duty steel axial impeller

Applications Include:

- *Process cooling for the hot industrial environments of steel mills*
- *Local hot spot cooling for foundries and smelters*
- *Fume removal*
- *Comfort cooling for workers in factories or warehouses*
- *High volume ventilations*

SPECIFICATIONS

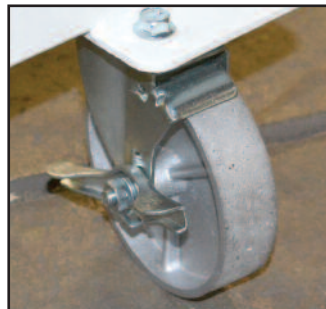

Size	36" Diameter
Rating	25,500 CFM
Type	Direct Drive
Electrical	208-230/460 V, 15/7 Amps
Weight	390 lbs.
Dimensions	34"D x 50"W x 77"H
Motor	5 HP, 3PH, 1725 RPM, TEFC

5 Fan Positions For Directing Airflow

Electric Switch With Protective Cover

Heavy-duty Locking Casters
